

I fully support the FISTS petition - of all others it does the most for the Amateur Radio Service and maintains its dignity, quality, and training in all aspects. Also in addition to the comments of Michigan Net, QMN, Inc., there is documented evidence of repeated ability of Morse Code CW A1 Wireless Telegraphy to supply communications during satellite communications failures and NBDP (Narrow Band Direct Printing) telegraph system failures in both "Soundings" and "The Professional Marine Communicator". I wish to add my "Me Too" onto their comments.
